MARES 25MM YOKE NUT SOCKET

This socket with extra-thin walls fits on all Mares yoke (INT) first stage regulators. Located at the top of the socket is an 8mm hex connection which is easily accessible with an 8mm long hex key.

€ 19,99

Material: Stainless steel

SKU: 2000-SST-015

MARES AIR CONTROL PLUG

This tool is used to open and close the Mares AIR control inflator plug and exhaust valve cap

€ 12,00

Material: Acetal / Stainless steel

SKU: 1200-SST-017

MARES DIN REGULATOR AST TOOL

This tool opens and closes the Mares AST anti-infiltration technology for DIN first-stage connections.

The tool has a stainless steel handle for opening and closing by hand.

€ 15,00

Material: Stainless steel

SKU: 2000-SST-011

MARES INT OR YOKE REGULATOR AST TOOL

This tool opens and closes the Mares AST anti-infiltration technology for INT (yoke) first-stage connections.

The tool has a stainless steel handle for opening and closing by hand.

€ 15,00

Material: Stainless steel

SKU: 2000-SST-010

MARES ROVER COVER TOOL

Opening and closing the mares Rover second stage cover can be done with ease using the cover tool for Mares Rover second stage.

Place the three recesses in the openings of the Mares second stage cover, then open or close the cover using the ribbed handle.

€ 17,00

| Material: Acetal

| SKU: 1000-SST-055

POSEIDON JETSTREAM FIRST STAGE TOOL SET

This tool is used to correctly assemble the internal parts of your Poseidon Jetstream first stage (model; 3720 and 3790).

The part is used as a fixture for the following parts:
Valve center with O-rings, Valve seat with O-ring, Valve piston and the Spring.

€ 21,00

Material: Acetal / Stainless steel

SKU: 1000-SST-004

POSEIDON JETSTREAM AND XSTREAM VALVE HOUSING TOOL

Disassembly and assembling off the valve housing of the Poseidon Jetstream and Xstream second stages.

Place the valve housing on the aluminium base of the tool set after wich the t-handle part can be used to unscrew the top part of the valve housing.

€ 29,00

Material: Aluminium / Stainless steel

SKU: 3000-SST-009

POSEIDON JETSTREAM / XSTREAM VALVE HOUSING O-RING INST. TOOL

Installation of the O-ring back into the valve housing of the Poseidon Jetstream and Xstream second stages.

This tool is best to combine with the Poseidon jetstream Stream valve housing tool.

€ 17,00

Material: Acetal

SKU: 1000-SST-002

POSEIDON VALVE SEAT TOOL FOR CYKLON FIRST STAGE

Removal and installation of the teflon valve seat of the Poseidon Cyklon first stage.

Use the brass end to remove the high pressure seat from the Cyklon first stage body and the acetal part to gently put it back in place after service.

€ 18,00

Material: Acetal / Brass

SKU: 1210-SST-001

POSEIDON CYKLON 300 LOCKING NUT SCREW TOOL

Opening and closing off the small locking nut screw on top of the filter of the Poseidon Cyklon 300.

Use the small slotted end of the tool to unscrew the locking nut on top of the filter of the poseidon Cyklon 300, after service do not screw it in to tight to prevent the screw from being opened due to use and corrosion build-up.

€ 14,00

Material: Acetal / Stainless steel

SKU: 1200-SST-005

POSEIDON FIRST STAGE SOCKET

Use this tool for the installation and removal of the top covers from the Jetstream and the Cyklon first stages. Slide the tool over the cover of the first stage and open or close it with a 3/8 inch torque or normal wrench. When closing the cover do not over tight it, (Torque should not exceed 30Nm).

€ 39,00

| Material: Aluminium

| SKU: 3000-SST-002

POSEIDON DRIFT TOOL FOR CYKLON SECOND STAGE

This tool makes the assembly of the valve housing of the Poseidon Cyklon second stages much easier.

€ 9,00

| Material: Acetal

| SKU: 1000-SST-024

SCUBAPRO BALANCE CHAMBER TOOL

The top of the balance chamber screw is most of the time too deep to be able to open it with a normal wrench therefore we have made this tool, it is used to open and close the Scubapro Mk16, MK18 and the Tusa R400 first stage Balance chamber and can be used as a hand tool or with a 14mm / 9/16" wrench

€ 15,00

Material: Stainless steel

SKU: 2000-SST-002

SCUBAPRO AIR-2 / TUSA DUO-AIR TOOL SET

Multi toolset for the service of the Scubapro AIR-2 and Tusa Duo-AIR regulators.

€ 55,00

Material: Aluminium / Acetal / Brass

SKU: 3000-SST-013

SCUBAPRO / TUSA FLOW VANE REMOVAL TOOL

Ever tried putting your fingers in the mouthpiece opening of a 2nd stage regulator, with this tool removing the flow vane becomes easy. It is suitable for several Scubapro and Tusa 2nd stages.

€ 9,00

Material: Stainless steel

SKU: 2000-SST-007

SCUBAPRO / TUSA COMBINED HP SEAT TOOL

This tool is used to remove and install the HP seat of the Scubapro MK16, MK17, MK11 and Tusa RS460 and RS790 first stage.

€ 9,00

Material: Acetal / Stainless steel

SKU: 1200-SST-002

SCUBAPRO / TUSA COVER TOOL

When removing the cover of several Scubapro second stages including the R095 R380, R390, S550, G500 / Tusa S60 this tool is the perfect solution.

Place the tool on top of the cover of the second stage so that the teeth of the tool fit into the small slits inside the cover of the second stage.

€ 14,00

Material: Acetal

SKU: 1000-SST-059

SCUBAPRO / TUSA DRIFT TOOL FOR DIAPHRAGM FIRST STAGES

To make the removal and installation of the high pressure seats as well as the small backup O-ring and washer in the body's of the Scubapro MK11, MK16, MK17, MK18 / Tusa R400 a piece of cake.

When removing the high pressure seat use the air gun from the top side of the first stage and the tool from the bottom side to remove the HP seat.

€ 9,00 | Material: Acetal | SKU: 1000-SST-027

SCUBAPRO BCD TOOL

This BCD tool is used to open and close all valves attached to Scubapro bcd's. Because of the big square opening in the middle it can also be used to open the valve connected to the inflator assembly on top of the jacket.

€ 20,00 | Material: Stainless steel / Acetal | SKU: 1200-SST-035

SCUBAPRO MK5 INTERNAL O-RING TOOL SET

Ever tried to put a new O-ring into the main body of a Scubapro MK5 first stage? With this tools the job is done in a matter of seconds.

€ 13,00 | Material: Acetal | SKU: 1000-SST-007

SCUBAPRO MK10 INTERNAL O-RING TOOL SET

Ever tried to put a new O-ring into the main body of a Scubapro MK10 first stage? With this tools the job is done in a matter of seconds.

€ 13,00 | Material: Acetal | SKU: 1000-SST-026

Scubapro housing plugs always need a 1/4 of a turn to put them into place or take them out of the housing during service, the use of this tool will make this job a piece of cake.

€ 7,00 | Material: Stainless steel / Acetal | SKU: 1200-SST-033

SCUBAPRO D300, D350 AND D400 2 IN 1 TOOL

This tool will open the big black and small silver nut located on the outside of the second stage regulator body of the Scubapro D300, D350 and D400. The tool has two sides with hardened steel pins and is made from acetal with a stainless steel handle.

€ 15,00

| Material: Stainless steel / Acetal

| SKU: 1200-SST-059

SCUBAPRO SEAT RETAINER SOCKET

For the easy removal and installation of the seat retainer found on the Scubapro models MK5, MK6, MK7, MK10 and MK20 first stage. The tool has hardened steel pins and a stainless steel handle

€ 14,00

| Material: Stainless steel / Acetal

| SKU: 1200-SST-001

SCUBAPRO / TUSA DIN RETAINING KNOB O-RING INSTALLATION BULLET

DIN retaining knobs have big and sharp threats and putting an O-ring over these threats most of the time damages the O-ring.

By using this small bullet the job is done quick and the O-ring is still in perfect condition. Place the bullet over the threats of the DIN retainer knob and slide the O-ring on it's place.

€ 5,00

| Material: Acetal

| SKU: 1000-SST-028

SCUBAPRO R290 COVER TOOL

Lots of time the cover of the 2nd stage is screwed on too tight or the technician is unable to remove it because of dirty threads.

This tool will assist in Removing the cover of the Scubapro R290 2nd stages.

€ 16,00

| Material: Acetal

| SKU: 3000-SST-030

SCUBAPRO MK20, MK21, MK25 BUSHING TOOL

Some of the Scubapro first stages use a bushing arrangement to help with the movement of the piston during diving. Installing these bushing rings and the small O-ring in-between them is made easy when you use this bushing tool.

€ 12,00

| Material: Acetal

| SKU: 1000-SST-034

SCUBAPRO COVER TOOL FOR R190, G250, G200, M5

This tool will assist in Removing the cover of the Scubapro R190, G250, G200 and the M5 2nd stages.

Lots of time the cover of the 2nd stage is screwed on to tight or the technician is unable to remove it because of dirty threads.

€ 10,00 | Material: Aluminium / Acetal / Stainless steel | SKU: 1300-SST-032

SCUBAPRO 2ND STAGE CASE RECOVERY TOOL

This tool can be used to save the plastic housings of the Scubapro R-series 2nd stage regulators when the valve body and the valve housing are badly corroded. By sticking the tool thru the right side plug opening and inserting it in the slit opening of the valve housing the technician can use a 14mm or a 9/16" key on the valve body to open the assembly without damaging the regulator case.

€ 10,00 | Material: Stainless steel | SKU: 2000-SST-008

SCUBAPRO MK25 PISTON BULLET

Fits on the Scubapro MK5, MK10, MK25 first stages for technicians that still wish to apply the previously recommended insertion method of the piston. This piston bullet will fit most of the balanced flow through pistons of Scubapro with the exception of some very old models.

€ 7,00 | Material: Brass | SKU: 4000-SST-002

SCUBAPRO HP SWIVEL O-RING INSTALLATION ASSIST TOOL

With this scuba tool putting the tiny O-rings on the high pressure swivel is done in a matter of seconds without shooting the O-rings in all directions or loosing the small metal swivel.

Place the tool on your desk, put in an empty high pressure swivel now place the o-ring on top of the swivel en push it sideways on the swivel top with your finger.

€ 4,00 | Material: Acetal | SKU: 1000-SST-048

SCUBAPRO HIGH PRESSURE SEAT TOOL FOR MK2 EVO

Removing and installing the high pressure seat from the body of the Scubapro MK2 Evo.

€ 12,00 | Material: Acetal/Stainless steel | SKU: 1200-SST-013

SCUBAPRO AIR2 COVER RING TOOL

This tool is used to open and close the Scubapro AIR2 cover ring and can be used for generations 4th and 5th.

€ 15,00

Material: Acetal / Stainless steel

SKU: 3000-SST-021

SCUBAPRO AIR2 (5TH GEN) INFLATOR PLUG TOOL

This tool is used to open and close the Scubapro AIR2 5th generation inflator plug.

€ 9,50

Material: Acetal

SKU: 3000-SST-027

SCUBAPRO AIR2 (5TH GEN) EXHAUST SPIDER TOOL

This tool is used to open and close the Scubapro AIR2 5th generation exhaust spider together with the on-way valve.

€ 14,50

Material: Acetal

SKU: 3000-SST-025

SCUBAPRO AIR2 (5TH GEN) INFLATOR STEM O-RING INSTALLATION TOOL

This tool is used to slide the o-rings from the Scubapro AIR2 5th generation inflator stem easily in place without damaging them.

€ 5,00

Material: Acetal

SKU: 3000-SST-029

SCUBAPRO AIR2 (5TH GEN) INFLATOR STEM TOOL

This tool is used to hold the round recessed part under the Scubapro AIR2 5th generation inflator button.

Hold the recessed part with the tool and at the same time loosen or fasten the screw on the other end.

€ 12,00

Material: Acetal

SKU: 3000-SST-028

SCUBAPRO AIR2 INLET TUBE O-RING INSTALLATION TOOL

This tool is used to slide the thick o-rings from the Scubapro AIR2 easily in place without damaging them.

The tool fits all AIR2 generations.

€ 7,00 | Material: Acetal | SKU: 3000-SST-020

SCUBAPRO AIR2 POPPET ASSEMBLY ASSIST TOOL

This tool is used to tension the spring in the Scubapro AIR2 poppet assembly so it is easier to install the lever, washer, and nut on top of the poppet assembly.

This tool can be used on all AIR2 generations.

€ 11,00 | Material: Acetal | SKU: 3000-SST-026

SCUBAPRO R295 AND R395 COVER TOOL

This tool is very useful for opening the Scubapro R295 and R395 second stage cover. By inserting the formed part on the top of the tool into the purge button, the cover of the second stage can be easily opened after removing the locking pin.

€ 19,00 | Material: Acetal | SKU: 1000-SST-017

To remove the torx screws out of the cap from the Scubapro MK21 first stage.

€ 19,00

SKU: 1800-SST-008

CONNECTION 3/8" TO 7/32"

Hex 7/32" key with connection to 3/8" Socket Wrench
1st class quality tool from the German brand Stahlwille.

Ideal to remove the swivel retainer of the Scubapro MK25 & MK10 first stages.

€ 25,00

SKU: 1800-SST-003

CONNECTION 3/8" TO 5/32"

Hex 5/32" key with connection to 3/8" Socket Wrench
1st class quality tool from the German brand Stahlwille

€ 25,00

SKU: 1800-SST-004

CONNECTION 3/8" TO 1/4"

Hex 3/8" key with connection to 3/8" Socket Wrench
1st class quality tool from the German brand Stahlwille.

€ 25,00

SKU: 1800-SST-001

35 TO 60MM ADJUSTABLE HOOK SPANNER

35 to 60mm Adjustable hook spanner to be used for almost all brands to install or remove 1st stage regulators caps.

€ 35,00

SKU: 1800-SST-035

GENERAL WORKSHOP TOOLS.

1,5MM ADJUSTABLE FACE SPANNER

This tool is something a technician can't do without, it can be used for several different brands and parts of diving gear.
Pin size is 1,5mm.

€ 16,00

SKU: 1800-SST-034

2MM ADJUSTABLE FACE SPANNER

This tool is something a technician can't do without, it can be used for several different brands and parts of diving gear.
Pin size is 2mm.

€ 16,00

SKU: 1800-SST-009

3/16" EXTRA LONG HEX KEY

3/16" extra long hex key used for adjusting the orifice of the Scubapro AIR-2 and the Tusa Duo-AIR regulators

€ 14,00

SKU: 1800-SST-050

UNIVERSAL HOSE WRENCH 9/16" TO 5/8"

Wrench imperial sizes of 9/16" to 5/8"
This wrench fits on about 85% of all scuba hoses and therefore it's the ideal wrench to have in your scuba gear bag.

€ 17,50

SKU: 1800-SST-055

WRENCH 5/8" TO 11/16"

Wrench imperial sizes of 5/8" to 11/16"
This wrench fits ideal on Apeks and Aqualung second stages.

€ 19,00

SKU: 1800-SST-030

GENERAL WORKSHOP TOOLS.

WRENCH 3/4" TO 13/16"

Wrench 3/4" to 13/16"
Fits on most older Aqualung second stages.

€ 23,00

SKU: 1800-SST-029

TORQUE WRENCH 5-25Nm

This high-quality torque wrench has a working range of 5-25 Nm. The connection is a 1/4" drive.

This torque wrench is a tool that can not be missed in any technicians workshop.

€ 89,00

SKU: 1800-SST-011

COMBINATION WRENCH 1/4"

Combination wrench 1/4"
Ideal when taking of or putting on second stage poppet nuts.

€ 14,00

SKU: 1800-SST-026

WRENCH 32MM

Single Open End Wrench 32mm.
Material: Vanadium steel, manganese phosphated

€ 13,00

SKU: 1800-SST-027

ALLEN KEY SET IMPERIAL

The kit contains 9 pieces of hex keys: 3/8", 5/16", 1/4", 3/16", 5/32", 1/8", 3/32", 5/64", 1/16". A must for every serious technician.

€ 14,00

SKU: 1800-SST-051

CHARGING PANELS

2 PORT AIR CHARGING PANEL (200 BAR/3000PSI)

The 2 port air charging panel (200 bar / 3000Psi) is ideal for small dive shops or private use, as well as paintball clubs.

The unit has 2 charging points (max 232Bar / 3000Psi) and a manometer.

€ 1299,00

SKU: 7000-SST-022

4 PORT AIR CHARGING PANEL (300BAR/4500PSI)

The 4 port charging panel is ideal for dive shops, dive clubs, and dive schools, as well as medium-sized breathing air filling stations.

The unit can fill 200 Bar / 3000 Psi as well as 300 Bar / 4500 Psi scuba cylinders.

€ 2599,00

SKU: 7000-SST-021

3 BANK STORAGE PANEL (300BAR/4500PSI)

The 3 bank storage (cascade) panel is ideal for dive shops, dive clubs, and dive schools, as well as medium-sized breathing air filling stations.

The unit can be connected between storage tanks (max 300Bar / 4500Psi) and a charging panel.

€ 1599,00

SKU: 7000-SST-023

CYLINDER CHARGING CONNECTOR (200BAR/3000PSI)

200 Bar / 3000 Psi cylinder charging connector

Connects between the filling hose and a 200 Bar / 3000 Psi scuba cylinder.

€ 36,00

SKU: 7000-SST-029

CYLINDER CHARGING CONNECTOR (300BAR/4500PSI)

Connects between the filling hose and a 300 Bar / 4500 Psi scuba cylinder.

Please note: this connector can only be used on 300 Bar / 4500 Psi scuba cylinders.

€ 44,00

SKU: 7000-SST-028

CHARGING PANELS

1 METER CYLINDER CHARGING HOSE (FOR CHARGING PANEL)

Thermoplastic fabric braided non kinking charging hose

2x Stainless steel 1/4 BSPP (G1/4) female ends with o-ring seal

Hose colour is black (for air use only)

Length 1 meter / 39.37 inch (Max working pressure 345 Bar / 5000 Psi)

€ 149,00

SKU: 7000-SST-030

1,5 METER CYLINDER CHARGING HOSE (FOR CHARGING PANEL)

Thermoplastic fabric braided non kinking charging hose

2x Stainless steel 1/4 BSPP (G1/4) female ends with o-ring seal

Hose colour is black (for air use only)

Length 1 meter / 39.37 inch (Max working pressure 345 Bar / 5000 Psi)

€ 159,00

SKU: 7000-SST-031

2 METER CYLINDER CHARGING HOSE (FOR CHARGING PANEL)

Thermoplastic fabric braided non kinking charging hose

2x Stainless steel 1/4 BSPP (G1/4) female ends with o-ring seal

Hose colour is black (for air use only)

Length 1 meter / 39.37 inch (Max working pressure 345 Bar / 5000 Psi)

€ 169,00

SKU: 7000-SST-032

G1/2 MALE WITH O-RING TO 6MM PIPE CONNECTOR

G1/4 male with O-ring to 6mm pipe connector

€ 9,00

SKU: 7000-SST-034

ONE WAY VALVE

One way valve G1/4 female to G1/4 female

This valve blocks the air from going in the reverse direction because the pressure is lower on that end.

€ 29,00

SKU: 7000-SST-027

CHARGING PANELS

INTERMEDIATE PRESSURE GAUGE FOR INFLATOR HOSE

The compact {1.5 in | 3.8 cm } diameter ultra-lightweight dual-scale (PSI and BAR) intermediate pressure gauge is ready to go with you anywhere. Perfect for helping diagnose problems in the field, it plugs into any standard BC low pressure inflator hose.

€ 25,00

SKU: 1800-SST-054

SLOTTED SECOND STAGE ADJUSTMENT TOOL

This specialized tool connects in-line between the 2nd stage regulator and the LP hose, allowing adjustments while the hose is pressurized.

€ 39,00

SKU: 1800-SST-077

M25 BENCH MOUNT

M25 bench mount with 3x Stainless steel connection bolts. can be used together with all of our test benches.

- Bottom connection 1/4" gas (straight)
- Side connection 1/4" gas (straight).

€ 128,00

SKU: 7000-SST-010

INSTRUMENTS

SLOTTED INLINE SECOND STAGE ADJUSTMENT TOOL WITH IP GAUGE

This specialized tool connects in-line between the 2nd stage regulator and the LP hose, allowing adjustments while the hose is pressurized.

Using the included pressure gauge the intermediate pressure (IP) of the first stage is adjusted if necessary.

€ 59,00

SKU: 1800-SST-052

SLOTTED INLINE SECOND STAGE ADJUSTMENT TOOL

This specialized tool connects in-line between the 2nd stage regulator and the LP hose, allowing adjustments while the hose is pressurized.

€ 45,00

SKU: 1800-SST-075

HEX INLINE SECOND STAGE ADJUSTMENT TOOL WITH IP GAUGE

This specialized tool connects in-line between the 2nd stage regulator and the LP hose, allowing adjustments while the hose is pressurized.

Using the included pressure gauge the intermediate pressure (IP) of the first stage is adjusted if necessary.

€ 59,00

SKU: 1800-SST-074

HEX INLINE SECOND STAGE ADJUSTMENT TOOL

This specialized tool connects in-line between the 2nd stage regulator and the LP hose, allowing adjustments while the hose is pressurized.

€ 45,00

INSTRUMENTS

DIN CYLINDER CONNECTION VALVE 300 BAR

This DIN valve can be connected to a DIN cylinder valve.
Often used to connect our Standard or starter test bench to an air source.

- Front connection DIN
- Back connection G1/4" with 60 cone inside
- Bleeder valve

€ 128,00

SKU: 7000-SST-017

DIN CYLINDER CONNECTION VALVE 232 BAR

This DIN valve can be connected to a DIN cylinder valve.
Often used to connect our Standard or starter test bench to an air source.

- Front connection DIN
- Back connection G1/4" with 60 cone inside
- Bleeder valve

€ 99,00

SKU: 7000-SST-018

BENCH MOUNT WITH M25 VALVE

M25 bench mount with 3x Stainless steel connection bolts and M25 valve.

Can be used together with all of our test benches.

- Bottom connection 1/4" gas (straight)
- Side connection 1/4" gas (straight).

€ 179,00

SKU: 7000-SST-012

MICRO BORE HOSE

1 meter long test bench micro bore hose.

- 1 connection is female 1/8 BSP
- 1 connection is female 1/4 BSP

€ 35,00

SKU: 7000-SST-011

TEST BENCH ANALOQUE MAGNEHELIC ADAPTER

This magnehelic adapter can only be used together with our test benches. It comes with a special connector that fits on the magnehelic meter connection on all of our test benches equipped with this device.

€ 22,50

SKU: 7000-SST-009

INSTRUMENTS

PROFESSIONAL TEST BENCH

When servicing dive gear is your profession this test bench is your buddy, it is equipped with an inhalation /exhalation magnehelic meter, a big intermediate pressure gauge with inflator hose connection. This test bench can be connected to a supply pressure of 330BAR/4800PSI witch can be reduced by a pressure regulator to your working pressure.

€ 1286,00

SKU: 7000-SST-004

STANDARD TEST BENCH

A must have for the small operator that wants to service their own gear, it is equipped with a supply pressure gauge, a middle pressure gauge with inflator hose connection and a magnehelic meter to measure the cracking or inhalation effort.

€ 499,00

SKU: 7000-SST-003

STARTER TEST BENCH

This unique device can be used to test SCUBA regulators at a basic level, it is equipped with a supply pressure gauge and a big middle pressure gauge with inflator hose connection both as well in BAR as PSI.

€ 299,25

SKU: 7000-SST-002

RESORT TEST BENCH

The resort test bench is an ideal option for dive resorts and small service shops it is equipped with a small middle pressure gauge and a magnehelic meter to measure the cracking or inhalation effort and does not have to be connected to an air-supply.

€ 325,00

SKU: 7000-SST-013

PROFESSIONAL TEST BENCH 6MM PIPE CONNECTION KIT

This connection kit can be used to connect the Professional test bench to an air source (max 300 bar) and to the bench mount.

(With M25 valve) € 271,00 | SKU: 7000-SST-019

(Without M25 valve) € 235,00. | SKU: 7000-SST-007

INSTRUMENTS

G1/4 MALE TO G1/8 MALE CONNECTOR

G1/4 male to G1/8 male both sides are 60 degrees conical.
